

• In addition to routine checks for each use, PPE should regularly undergo a detailed inspection by a competent person. Petzl recommends an inspection every 12 months and after any exceptional event in the life of the product.
• PPE inspection should be conducted with the manufacturer's Instructions for Use.
Download the instructions at [PETZL.COM](https://www.petzl.com).

CAM-LOADED ROPE CLAMPS

----------------------------------	-----------------------	-----------------------	-----------------------	-----------------------	-----

2. Preliminary observations

- Verify the presence and legibility of the serial number and the CE mark.
- Verify that the product lifetime has not been exceeded.
- Compare with a new device to verify there are no modifications or missing elements.

<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
-----------------------	-----------------------	-----------------------	-----------------------	-----------------------

3. Inspecting the frame

- Check the condition of the frame (marks, cracks, wear, deformation, corrosion...).
- Check for wear caused by rope running through the device.

<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
-----------------------	-----------------------	-----------------------	-----------------------	-----------------------

4. Inspecting the cam

- Check the condition of the cam and the attachment hole (marks, cracks, wear, deformation, corrosion...).
- Check the condition of the cam axle (deformation, cracks, corrosion...).
- Check the cam's rotation and the effectiveness of the return spring.

<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
-----------------------	-----------------------	-----------------------	-----------------------	-----------------------

5. Checking the closure system

- Check the condition of the links or screws (deformation, marks, wear, cracks, corrosion...).
- Check the condition of the safety catches, and verify that the return spring works.

<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
-----------------------	-----------------------	-----------------------	-----------------------	-----------------------

6. Function check

- Verify that the rope clamp slides along the rope in one direction and locks in the other direction.

<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
